PHP GET and POST Method Tutorial | FormGet PHP GET and POST Method Tutorial. Neeraj Agarwal. While dealing with the forms, information can be submitted and transferred to same or another page. To send submitted data through form, one can use GET & POST method to do that in PHP. A form data can be submitted using these two methods. Both are used for same purpose but stands apart. PHP: \$_POST - Manual One feature of PHP's processing of POST and GET variables is that it automatically decodes indexed form variable names. I've seen innumerable projects that jump through extra & un-needed processing hoops to decode variables when PHP does it all for you: Example pseudo code:.. modernvespa.com We would like to show you a description here but the site won't allow us.
